Tree Products

There are millions of things made from trees. Things made from the wood of trees are important. Houses are made of wood.

Even our furniture is
made from wood. The books
on the bookshelves come
from trees too. Paper is
made from trees.

Games and toys can be made from wood.
So many things in my house are made from
tree products like wood and paper. I just can't
list them all. Trees even make the air better, but
that is another paper!
